COASTAL BERMUDA GRASS (CERTIFIED)
This grass is extra popular for grazing and hay. Ask for our sheet giving general information and planting and fertilizing recommendations. Feb. 15 to April 15 is generally regarded as the best and safest time to set out stolons or sprigs of Coastal Bermuda. We are digging now—when the ground is dry enough. Use 5,000 to 7,000 per acre. We bale our stolons like bales of hay, about 750 lbs. each. The quantity per bale varies but the average is about 6,000. Packing bales smaller this year than last. Bales have metal strips around all sides. Bales submerged in water soon as dug. Read our information sheet. Make arrangements with us before sending trucks. Prices per 1,000 stolons f.o.b. here are:

Bales or bulk on your truck here...Prices later (2,000 to 4,000 sprigs packed in wet sawdust for express shipment are $1.50 M. Our stolons are the BEST to be had.

DuPONT DAIRY CATTLE SPRAY & MARLATE
A wettable powder. Easy to mix with water. Safe. Recommended by USDA for use on dairy animals. Low cost per cow per day. Gives long-lasting control of all flies, lice, flies, and mosquitoes. 4-lb bags labeled “Marlare.” Both products are the same—80% Technical Methoxychlor.
